

Dosch 3D: Airport Vehicles rounds out Airport theme at Dosch Design

(Nov. 25 2009) Dosch 3D: Airport Vehicles contains 20 detailed 3D-models for the realistic depiction and visualization of activities on an airport tarmac in daily operation. From airplane loading and boarding to taxiing away from the gate, to refueling and even emergency response, it all can be visualized easier with this new Dosch 3D-product. Vehicles provided include 2 ground luggage transport systems, 3 luggage loading vehicles, 2 people-moving systems (incl. Maglev-train), 2 access stairs trucks, as well as various specialty-vehicles (incl. tow tractor, catering truck, fuel-truck, fire truck, snow removal truck).

As always when creating a Dosch 3D-product emphasis has been on realistic details and overall authenticity of the models. They are intended to create activity-filled airport scenes in most areas of operation.

This product complements Dosch 3D: Airplanes (9 airplanes, 1 helicopter), as well as D3D: Industrial Buildings (incl. 2 airports with tower; parking garage), and D3D: Passenger Transportation (Buses & train types for intra-terminal airport ground transportation or transportation systems connecting airports to nearby cities). Together these products cover most features of an airport environment.

The completely textured 3D-models are provided in multiple file formats: 3DS, 3dsmax (version 4 and above), Lightwave (version 6.5 and above), OBJ, Maya (version 4 and above), VRML, SoftimageXSI, Cinema 4D (version 8.5 and above), Collada DAE and FBX. The list-price of this product is \$179. Any Dosch 3D-product or other product lines (texture collections, HDRI-lighting etc.) can be checked out at www.doschdesign.com.

About Dosch Design

DOSCH DESIGN develops demand-inspired computer graphics products for professional use in the areas of 3D-design, visualization, animation, movies/TV and desktop publishing. In this endeavor Dosch Design translates its high quality-standards on the development side into equally high-quality products with an attractive price-performance ratio. When used in compliance with the license agreement, Dosch Design products are always license-free, therefore not causing any further cost when used commercially.

Promotional images and more detailed information regarding any new product can always be obtained through our *Media Contacts in Germany and USA*:
